## PROJECTS

### 1. Smart Task Management & Productivity Tracker

Developed a full-stack task management web application that allows users to organize, prioritize, and track their daily activities efficiently. The platform features task categorization, deadline reminders, and a productivity analytics dashboard using Chart.js for visual insights. Built with React.js, Node.js, and MongoDB, it supports user authentication, responsive design, and data synchronization, helping users boost focus and manage tasks seamlessly.

### 2. Dynamic News Aggregator Web App

Created a responsive web application that aggregates and displays real-time news articles from multiple trusted sources using external REST APIs. The app enables users to browse news by category, search for specific topics, and bookmark favorite articles for later reading. Implemented using HTML, CSS, JavaScript, Node.js, and MongoDB, the project features API integration, dark/light themes, and smooth pagination for an engaging and user-friendly experience.

### 3. Community Discussion Forum (Reddit-like Web App)

Designed and built a full-stack community forum web platform that enables users to create posts, comment, upvote, and engage in discussions under various topics. The system includes user authentication, profile management, and real-time updates powered by Socket.io or Firebase. Developed with React.js, Express.js, and MongoDB, it incorporates an intuitive UI, secure backend APIs, and an admin moderation panel to ensure an interactive and well-managed user community.

## EDUCATION

### Bachelor of Computer Applications

University of Allahabad | 2023 - 2026

### Senior Secondary School

Kendriya Vidyalaya no 1 ,Patiala punjab | 2021-2023

## TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML, CSS, React.js / Vue.js, Tailwind CSS

Web Development: Flask, REST APIs, Frontend Design

Programming Concepts: Object-Oriented Programming (OOP), CRUD Operations

Tools & Technologies: Git, VS Code

Database Management: MySQL

Productivity Tools: Microsoft Word, Excel, PowerPoint

Design Tools: Figma, Canva
